

Data Collection

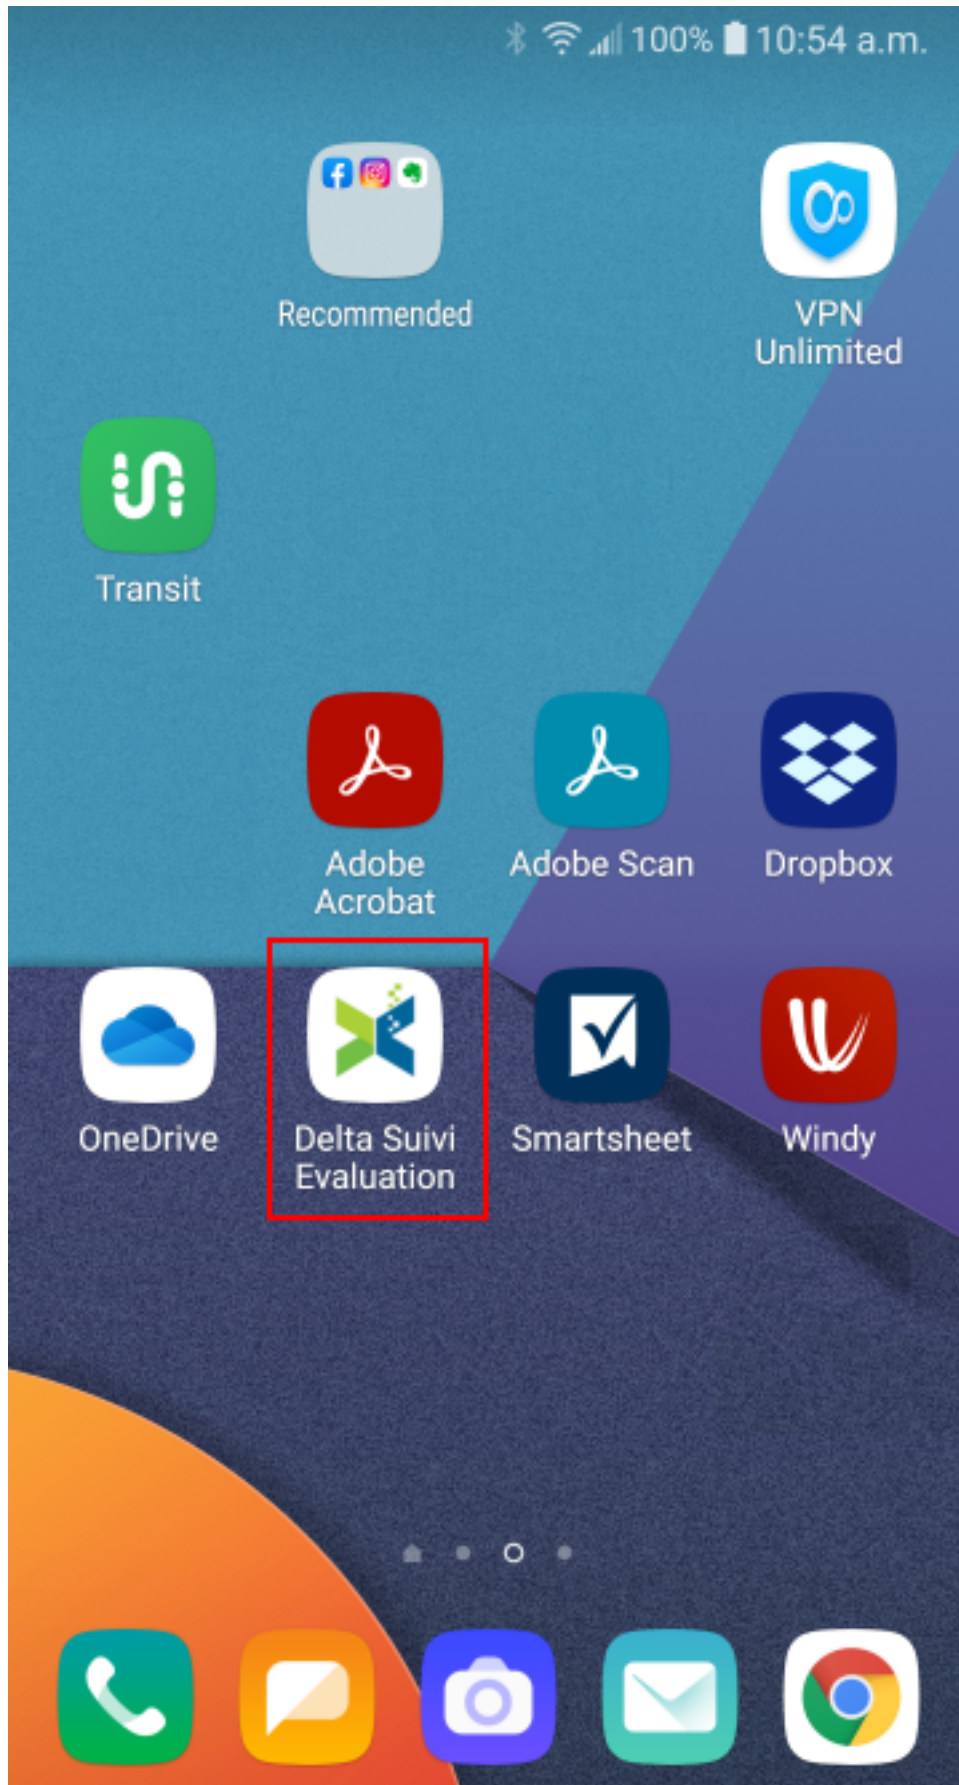

Data Collection: Collect Data via Mobile Device

Delta features a **mobile app** for data collection. The app works online and offline, and can be installed on any Android device.

To **install** Delta Mobile, click [this link](#).

Once Delta Mobile is installed, tap its icon to open the app.

Workspace

Register login and password

 LOGIN

Web-based Monitoring & Evaluation Software

Enter your email address, your password, and the name of your assigned workspace. Check with your system administrator if you don't have those credentials. **IMPORTANT:** the app will only link to **production (live) workspaces**. The workspace is **NOT** the URL of the system you're connecting with.

Data Collection

Check the **Register Login and Password** box to allow the app to remember you the next time you use it, then tap the LOGIN button. The app will open with the list of projects.

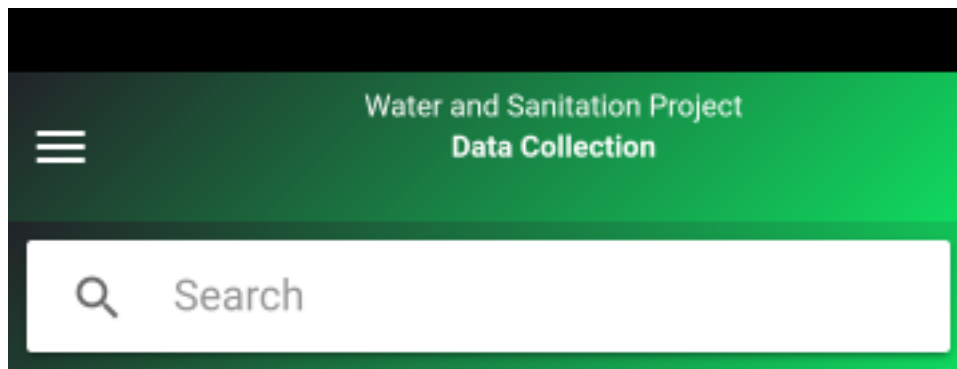

Web-based Monitoring & Evaluation Software

Tap the name of the project you want to work with. The default view is Data Collection. You will see a

Data Collection

list of all data collection forms you have permissions to for the project.

Project Beneficiaries

Web-based Monitoring & Evaluation Software

Tap the menu at top right to access the navigation menu. The menu contains four items:

Data Collection

- Projects List
- Activities
- Indicators
- Data Collection

The **Projects List** is the list of all the projects you're allowed to access via the workspace. This is the default view when you launch the application.

Activities shows all the activities for which you can collect data.

To work offline, tap **Offline Mode** at the bottom of the main menu screen. Select the item(s) you want to work with (activities, indicators, or data collection forms), then tap **Load Data** to download the data onto your device. Once the download is complete, you can work without an internet connection.
