

Portfolio Views

Portfolio: Projects Map View

The second available portfolio view in the Portfolio screen is **Projects Map**. Click the Projects Maps tab to switch to a map view of all the projects in the portfolio.

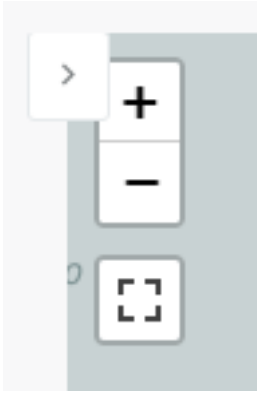

The Projects Map can be filtered by **Status**, **Sectors**, **Funding Source**, and **Sub-Localities**. Use the toggle to hide the left pane and show the map controls.

The Map controls work the same way as the Google Map controls. Use the + and - buttons to zoom in and out. You can also use the scroll wheel on your mouse to zoom in and out of the map. Use the square brackets button to display the map full screen. To return to the normal screen view, press the Esc key, or click the square brackets button again.

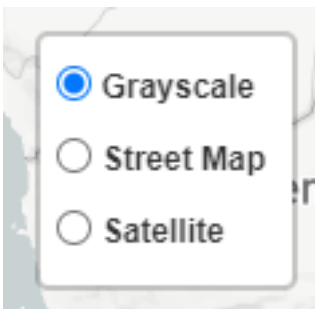

Portfolio Views

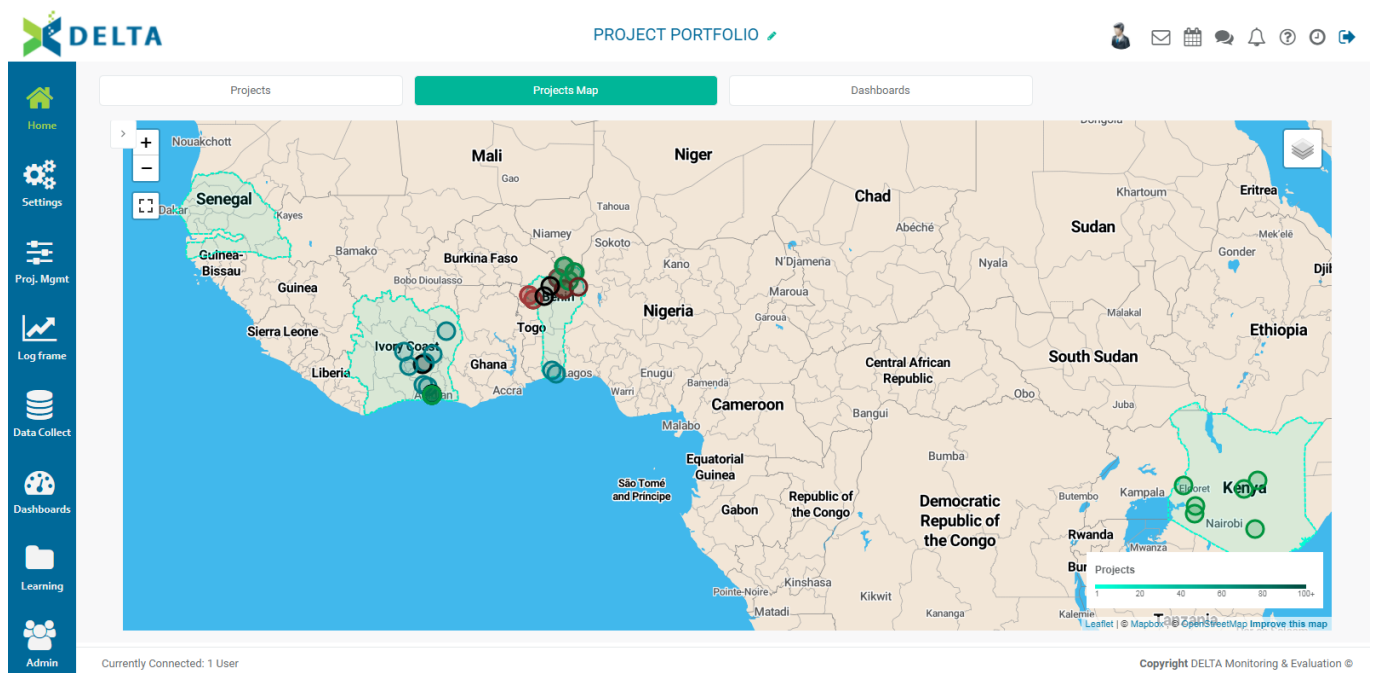

The default map background is **Grayscale**. Additional controls are located at the top right of the map.

Two additional backgrounds are available: **Street Map**, and **Satellite**.

Street Map displays additional street information when the zoom is used.

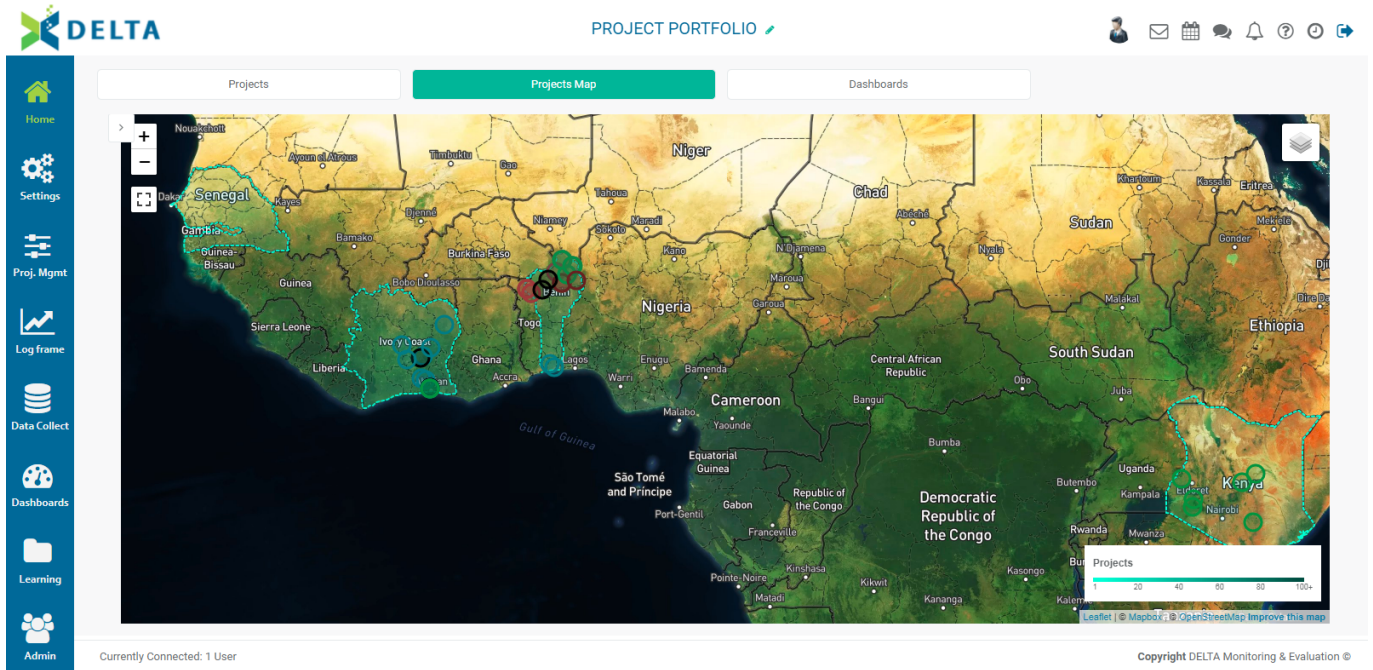

The **Satellite** view adds a realistic background to the map.

Portfolio Views

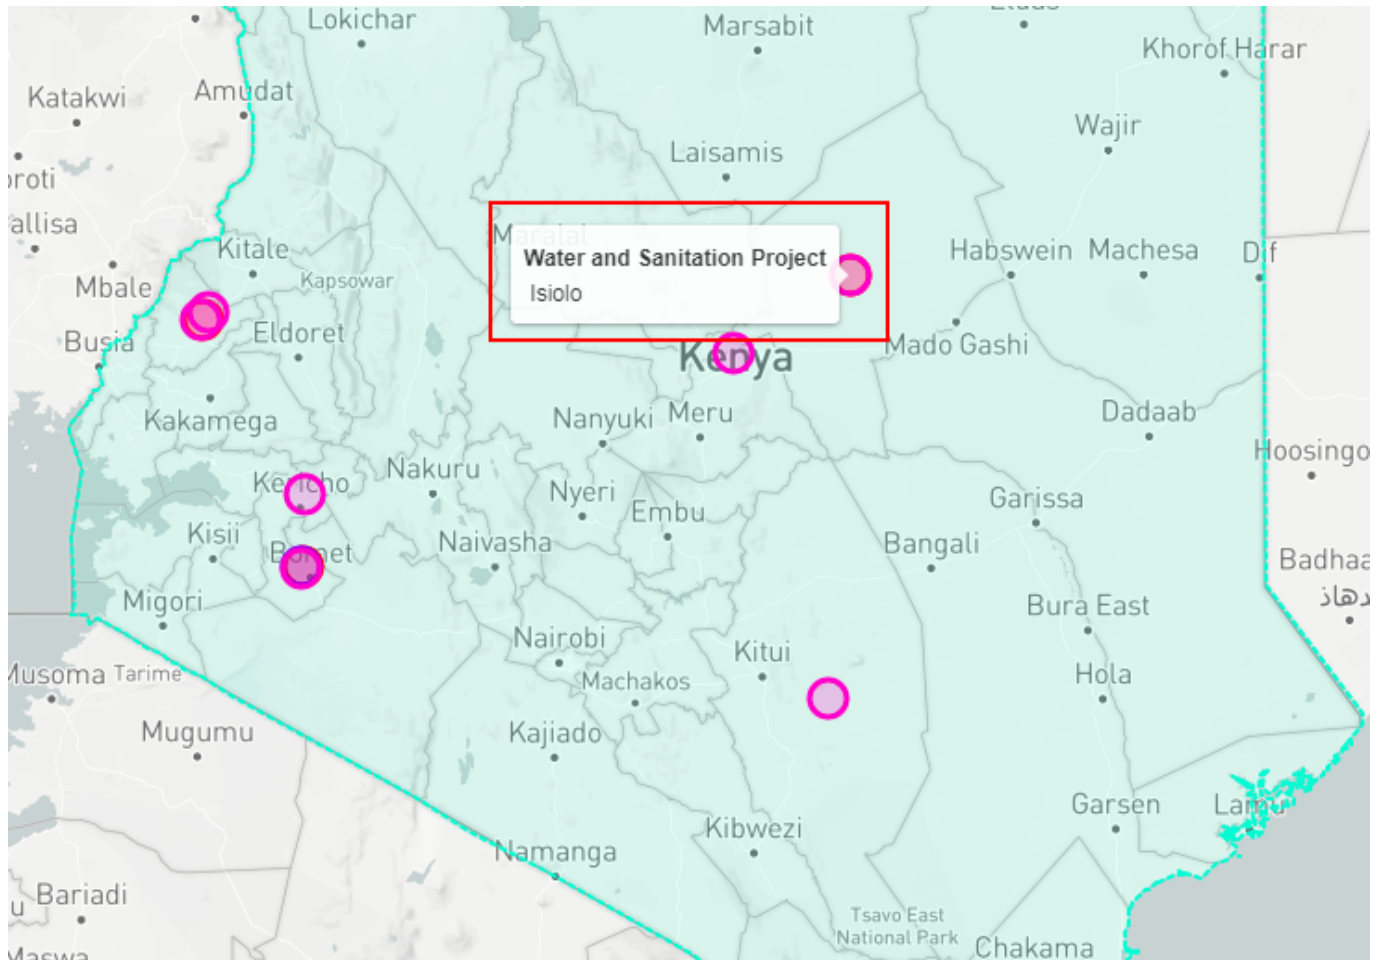

The map displays project locations by country. The country color overlay represents the number of projects in that country; the color scale is shown at the bottom right of the map. Delta's mapping and graphing functionality allows users to get at-a-glance information about the map or graph. Mouse over a country to view how many projects are taking place in that country.

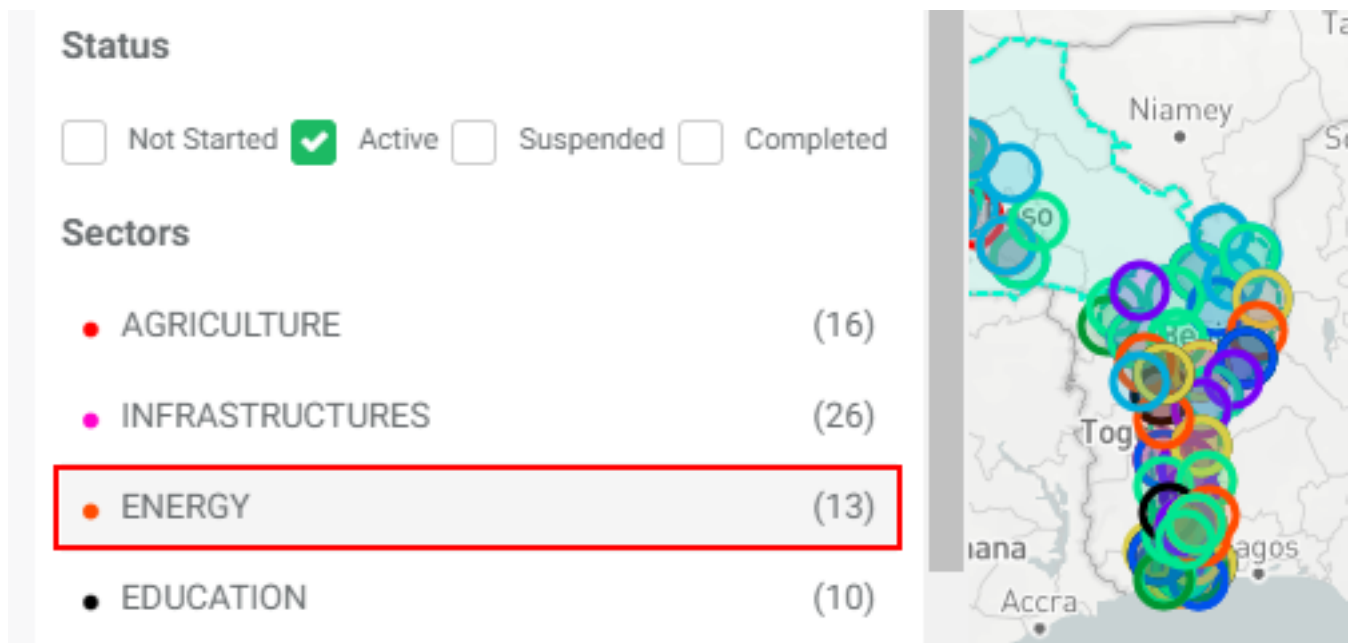

Each circle on the map represents a specific location where project activities are taking place. Circles are color-coded by Sector. Sectors are assigned when a project is created. Mouse over a circle to see its at-a-glance information.

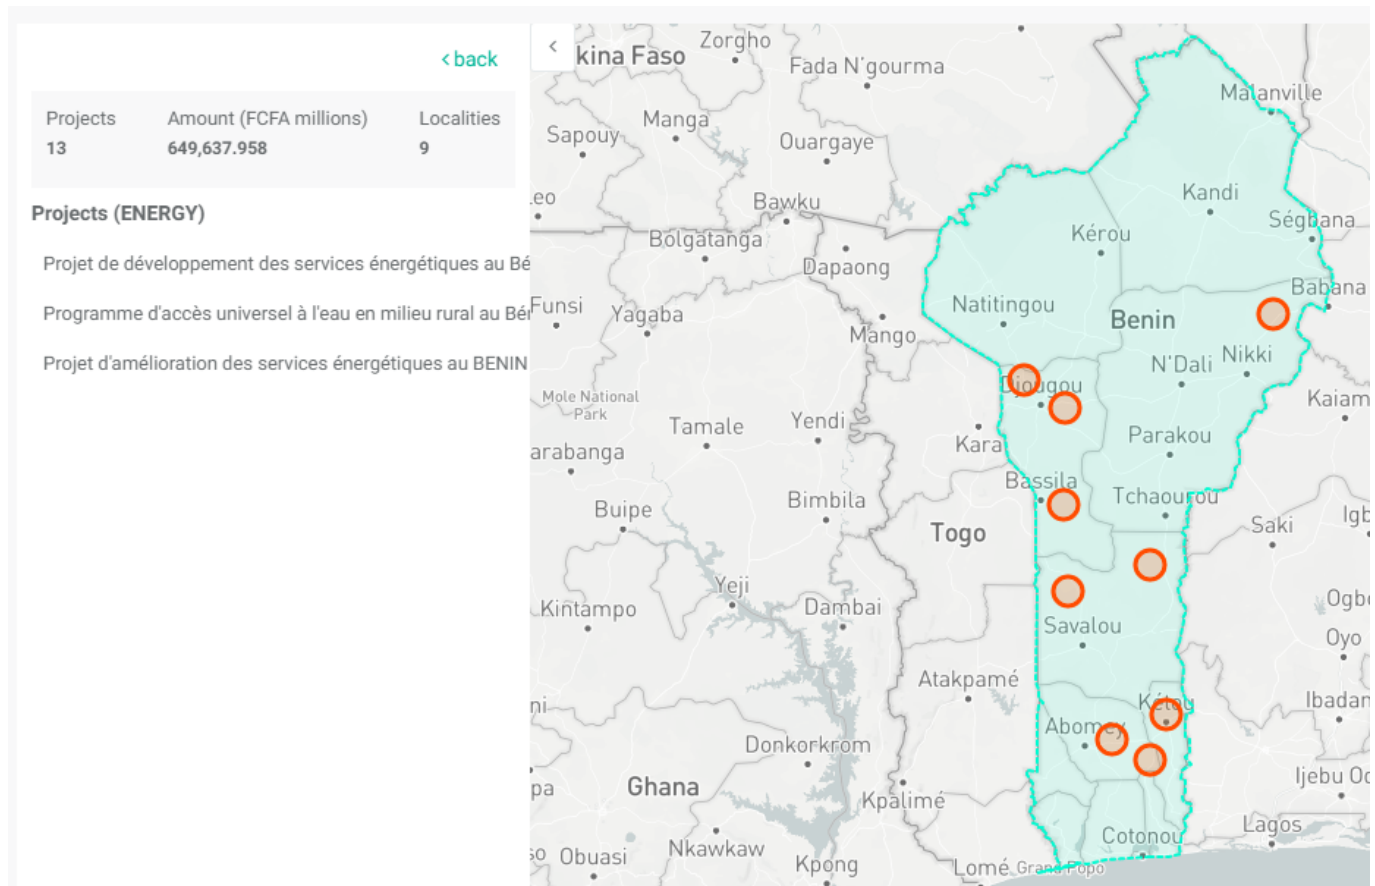

Portfolio Views

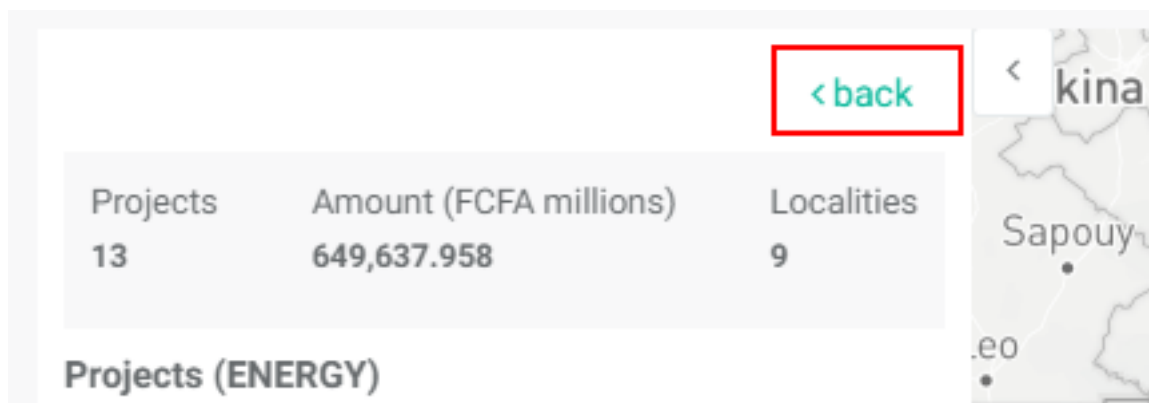

To **filter the map by Sector**, toggle the left pane display, and select the appropriate sector.

Portfolio Views

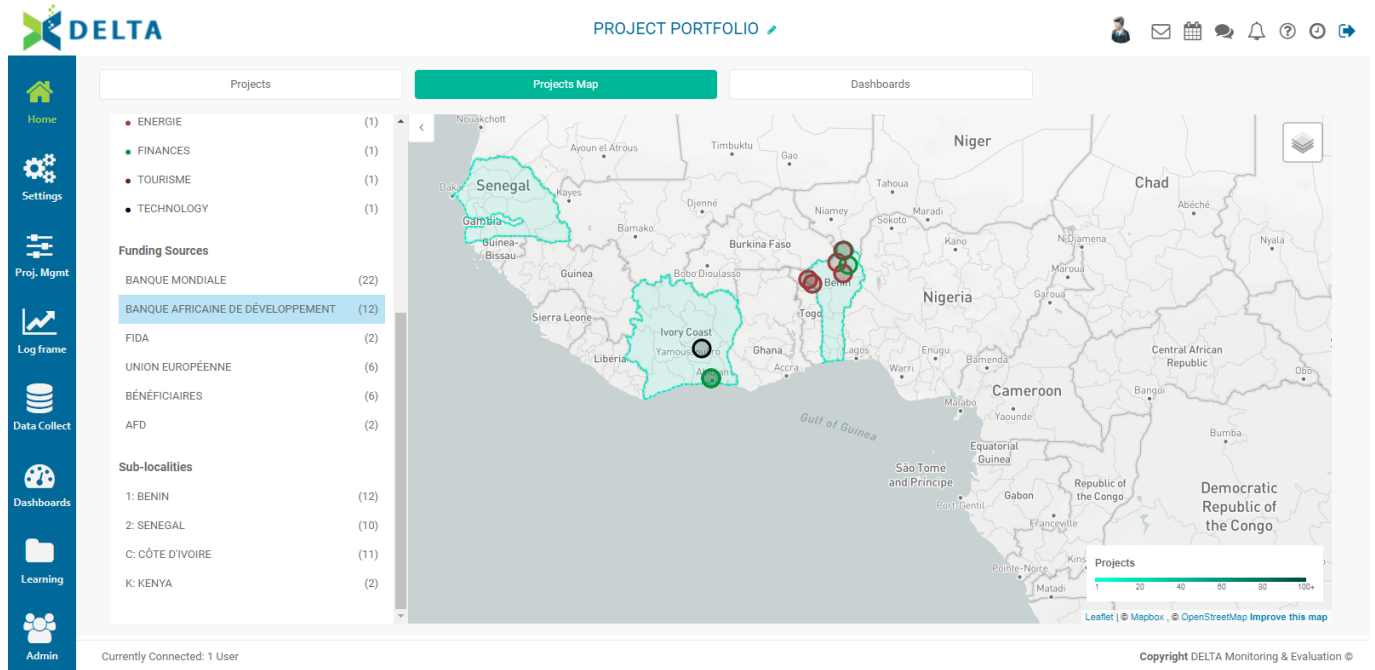

To **return to the full display**, click Back next to the left pane toggle.

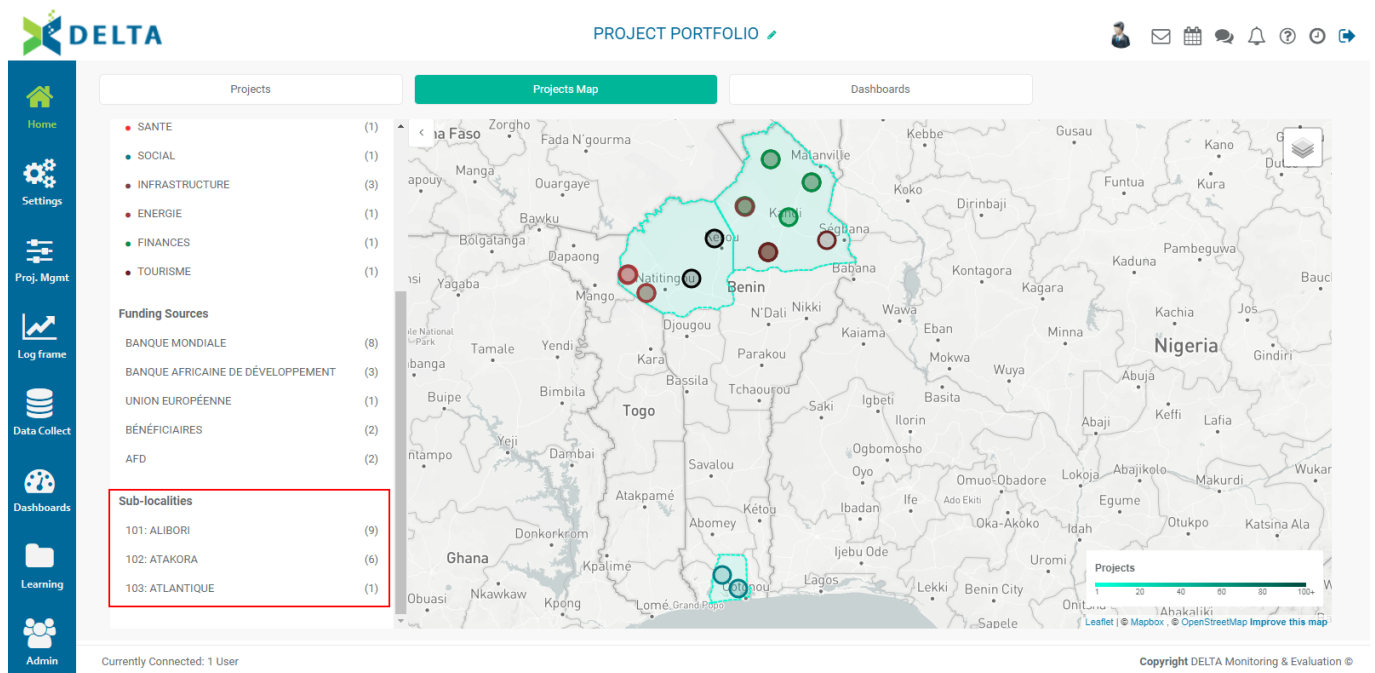

To **filter the map by Funding Sources**, select the appropriate funding source in the left pane. The map will update itself to show only projects underwritten by that funding source.

Portfolio Views

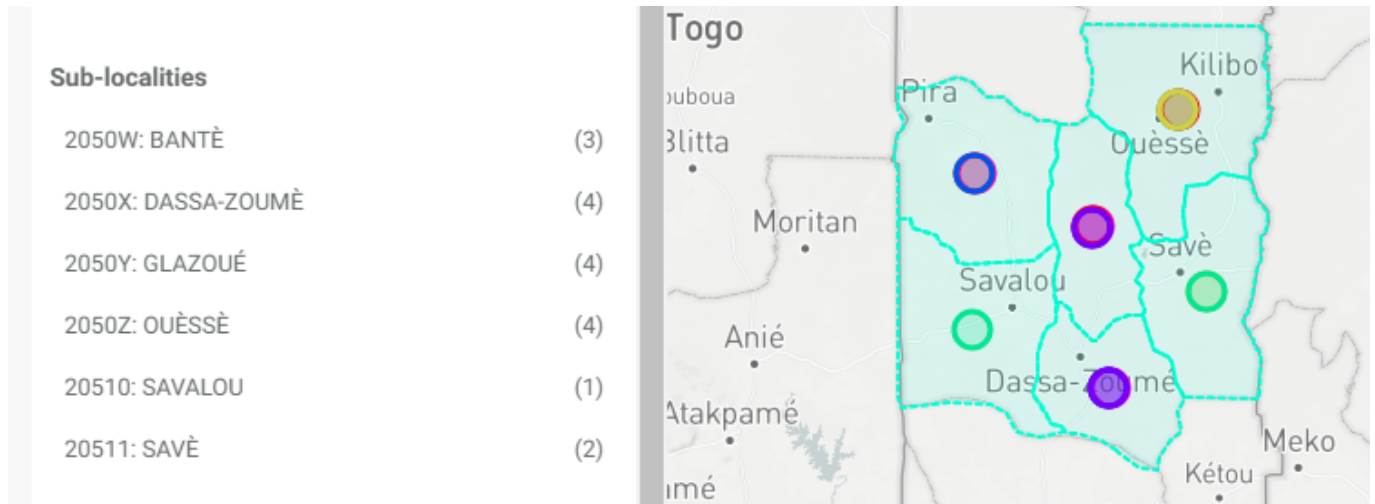

Click the Funding Source to deselect it and return to the full map view.

To **filter the map by Sub-Localities**, scroll down the left pane to view the Locations list, and select the appropriate country to see its list of sub-localities. The name of the selected locality will also appear at the top of the left pane, regardless of its level in the geography list.

Select a sub-locality to view only that sub-locality's information. Depending on the number of geographical divisions used in the Geography List, additional sub-localities will appear, making it possible to drill down to fine-grained data.

Portfolio Views

To return to the full display, click Back next to the left pane toggle.

To return to the default Portfolio view, click the [Projects](#) tab.
