

Project Dashboards

Project Home Page: Activity Dashboard

The **Project Activity Dashboard** regroups all the detailed data for each project activity.

Select an activity from the pick list. Only activities which contain data appear in the list. The graphs and maps will update with the selected activity's data.

The screen displays basic information about the activity.

Project Dashboards

Start: Jan 15, 2015

End: Dec 31, 2020

Status: On Going

Unit of measure: Nbre

Entity Responsible: AZI: Water and Sanitation Specialist

Comments

Select a geography level to view that level's data on the map.

Geography Level 1

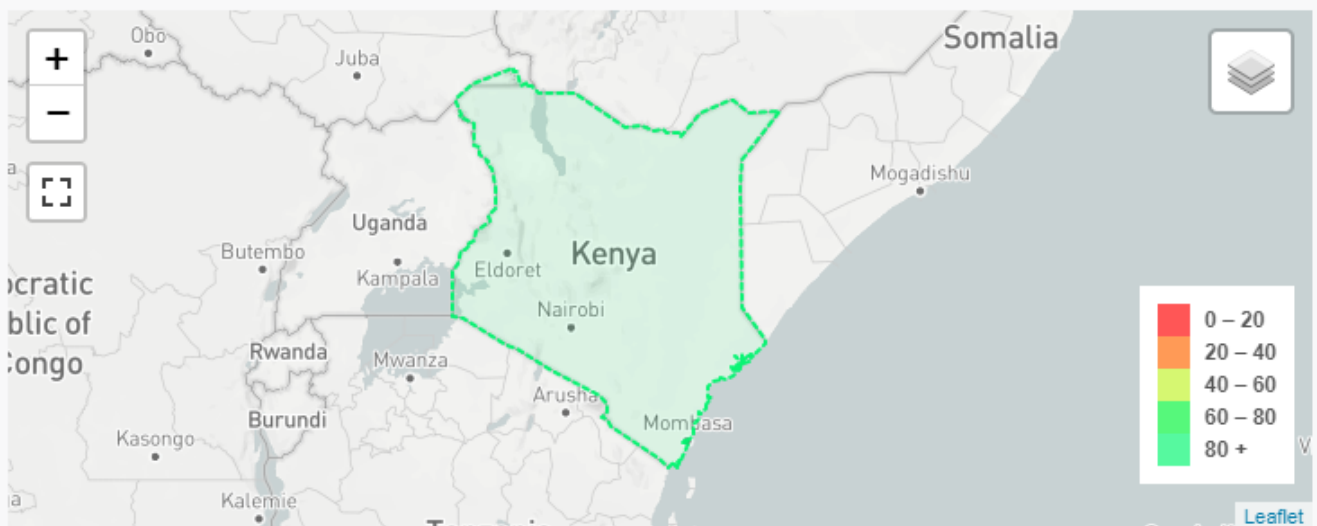

Start: Jan 15, 2015

End: Dec 31, 2020

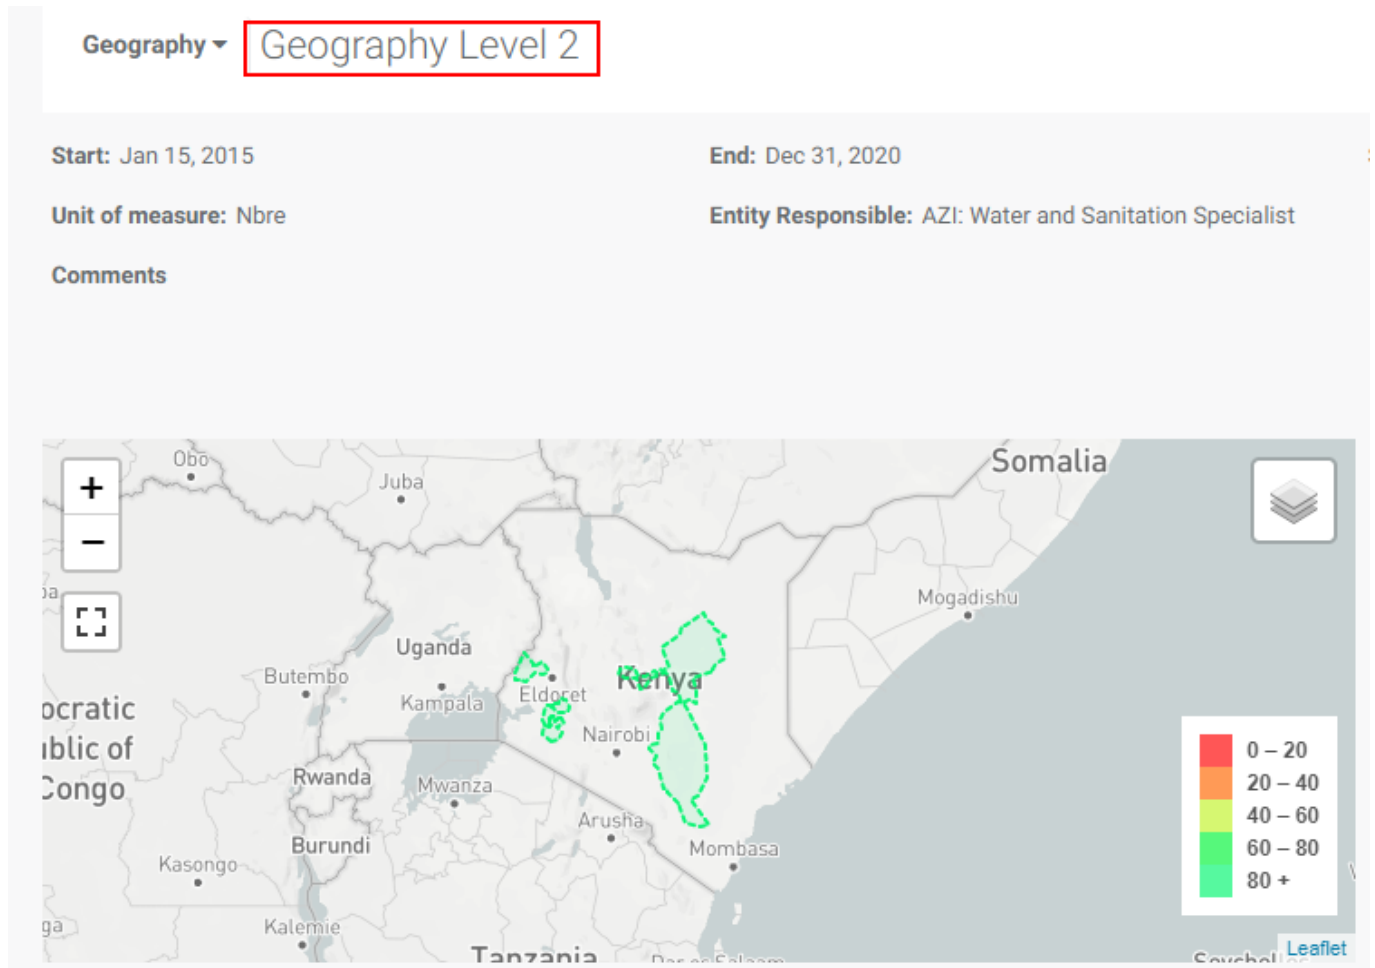

Unit of measure: Nbre

Entity Responsible: AZI: Water and Sanitation Specialist

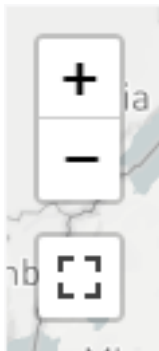

Comments

Project Dashboards

The map controls work in a similar fashion to Google Map controls. Use the Zoom controls to zoom in and out of the map. You can also use a mouse scroll wheel to zoom. You can also display the map fullscreen using the third control.

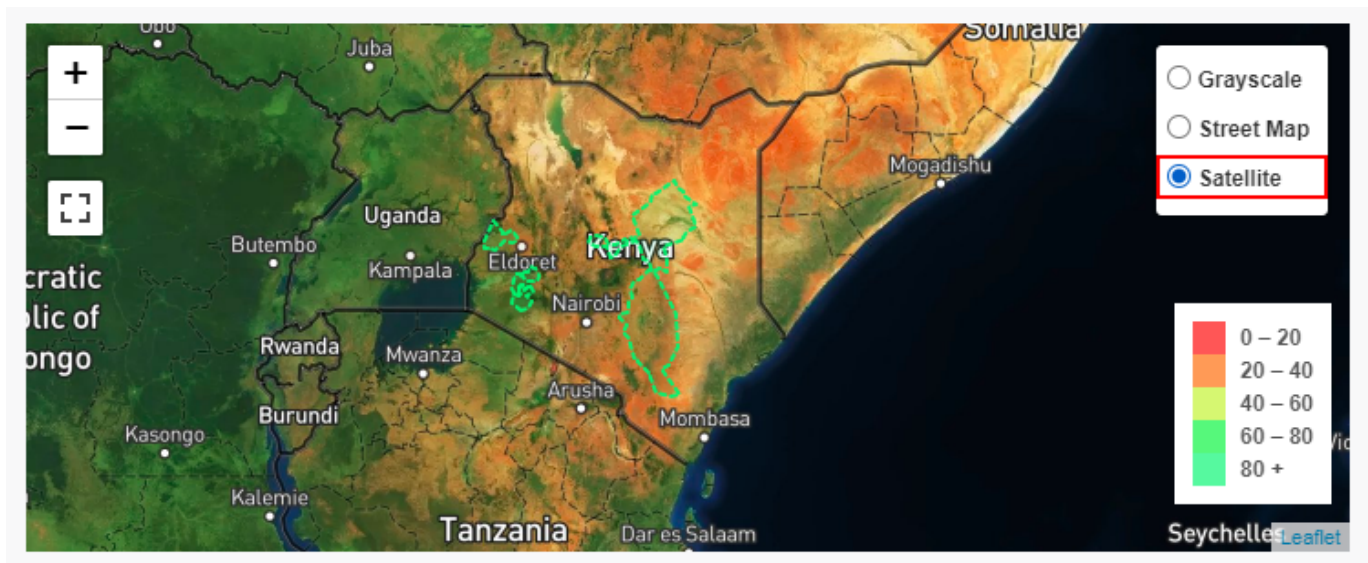

To return to the normal view from a fullscreen map, press Escape on your keyboard, or click the Exit Fullscreen button at top right of the fullscreen view.

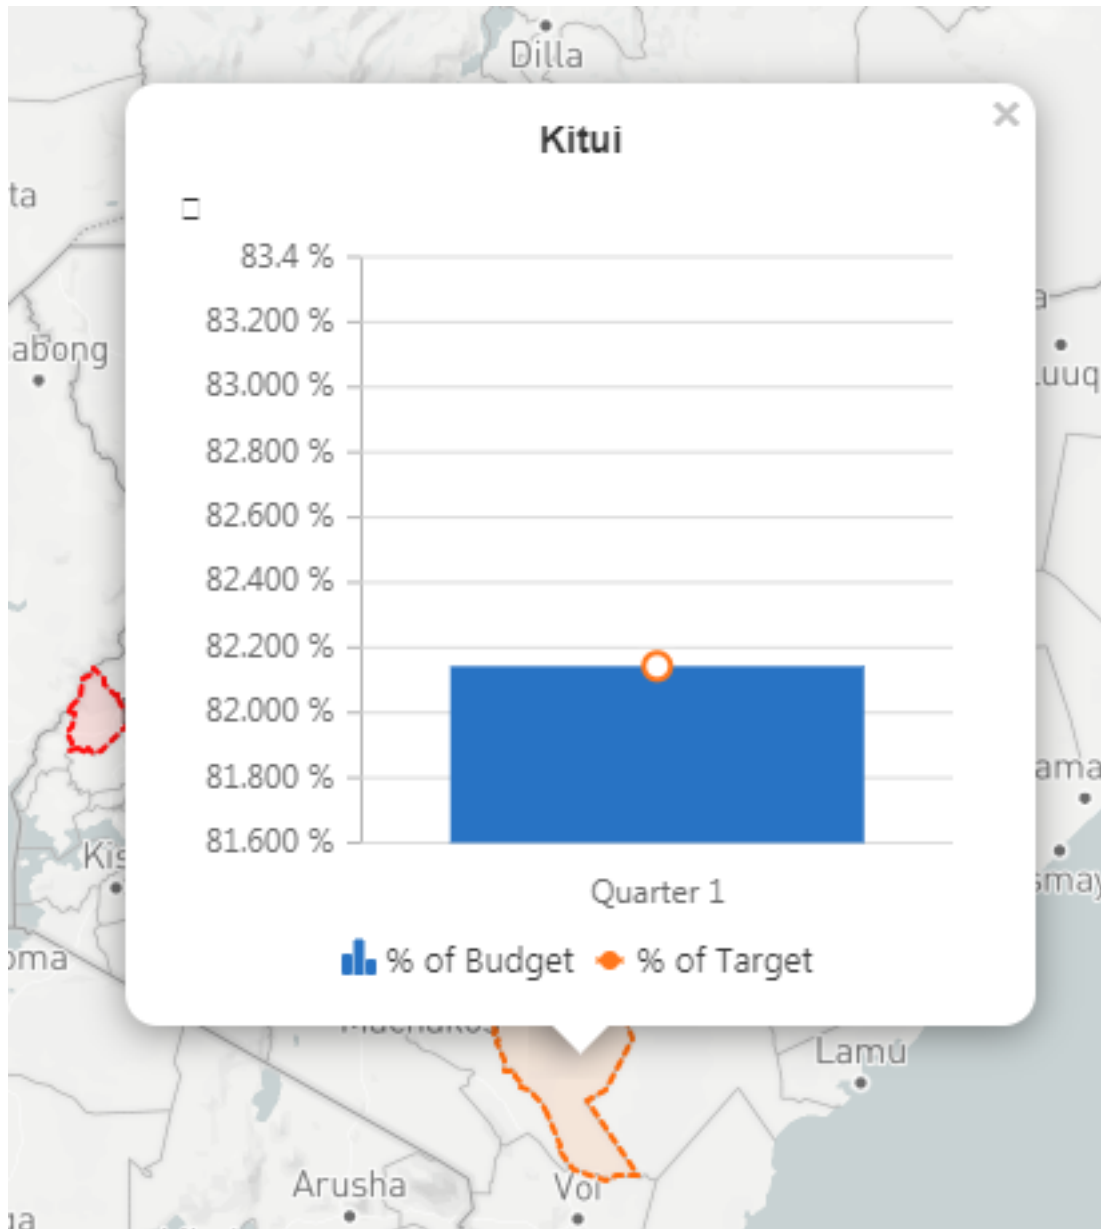

The default map view is **Grayscale**. Additional map controls are located in the top right corner of the map, and include **Street Map View**, which adds location names and has a slightly different color, and **Satellite View**, which adds realistic features to the map.

Project Dashboards

Clicking on a data area on the map will popup a small graph showing the performance for that location. Click the x at top right corner of the popup to close it.

Project Dashboards

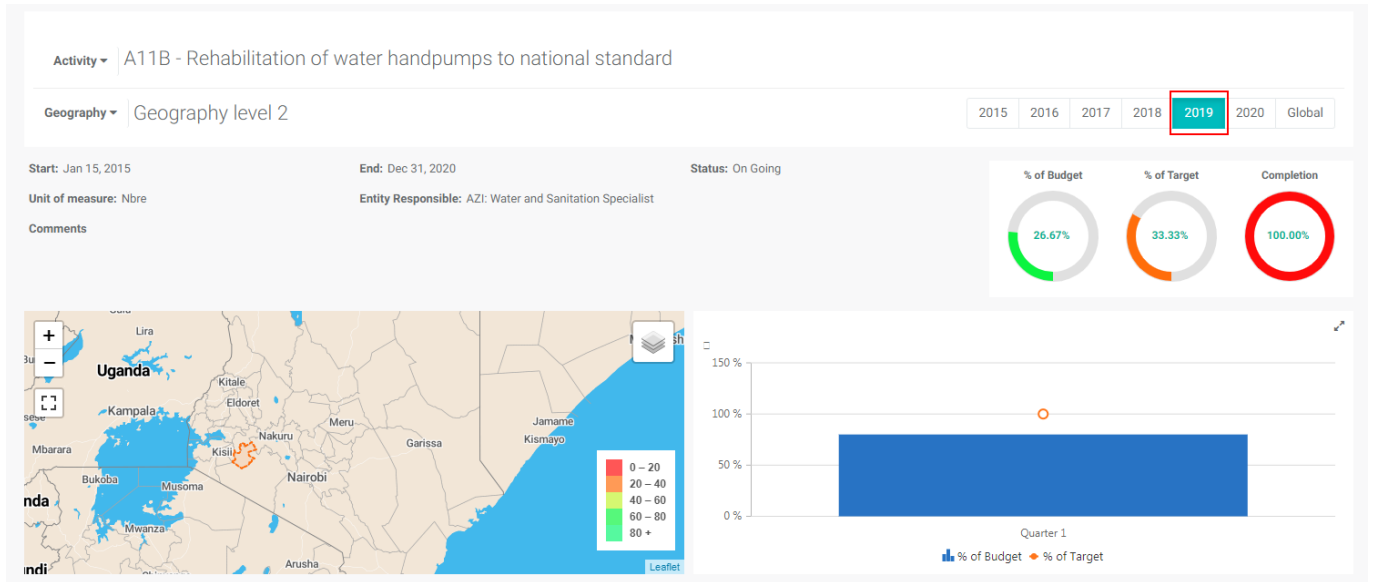

The default timeline for the display is Global. This setting shows all the data from the activity for the entire project.

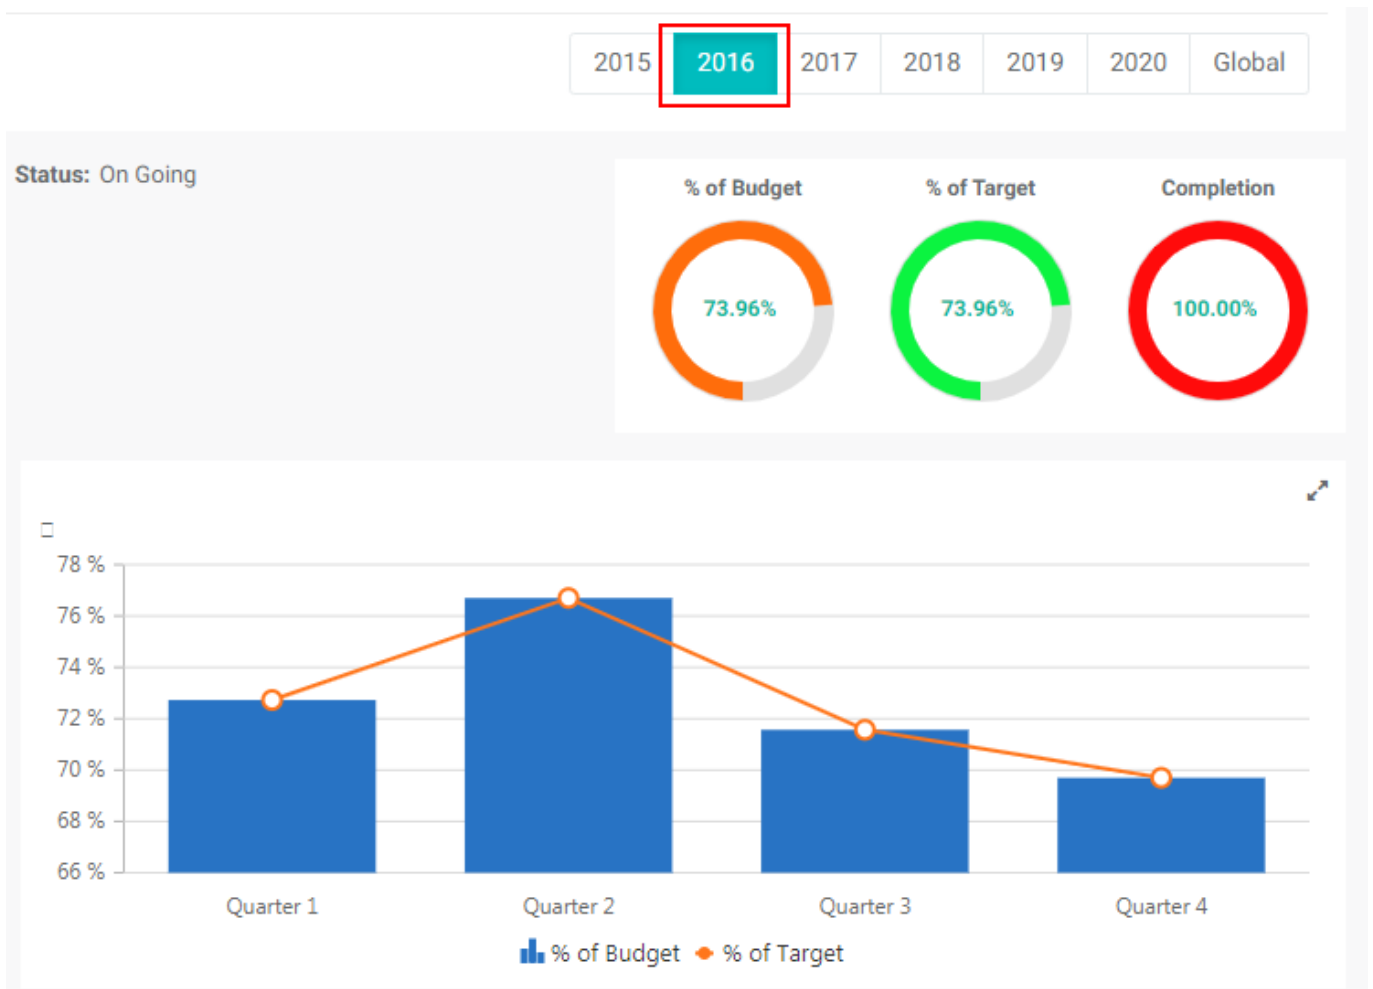

Click a year to bring up only the data for that year. The at-a-glance %Budget, %Target, and Completion at upper right will update according to the selected year. The year setting will also be reflected on the data shown on the map at the currently selected geography level.

Project Dashboards

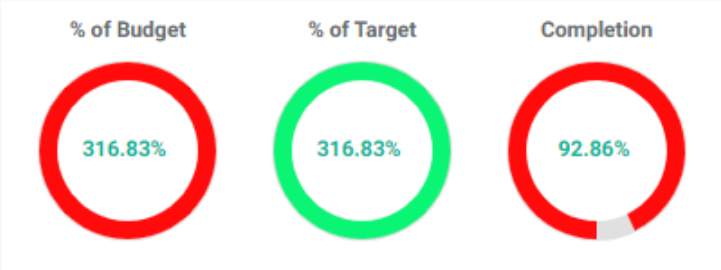

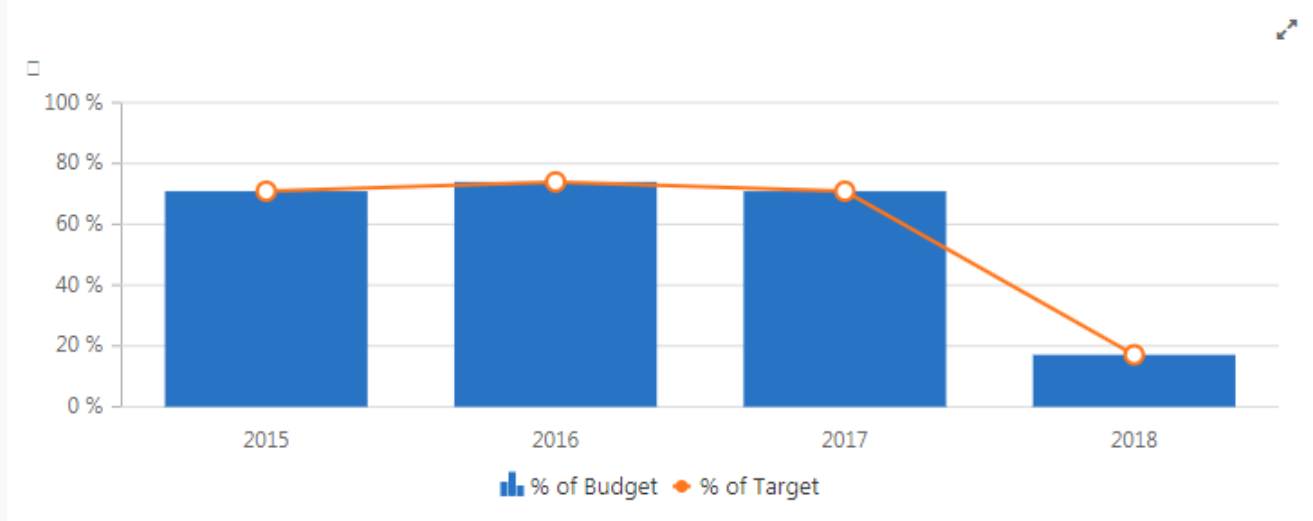

The graph at lower right displays the details for each period of each selected year, or for each year if Global is selected.

Project Dashboards

2015	2016	2017	2018	2019	2020	Global
------	------	------	------	------	------	--------
